

## AIR FREIGHT

### OVERSIZED GAS TURBINE PARTS FOR PULAU INDAH POWER PLANT

As our Port Klang team handled the receiving and transport of the Gas Turbine unit for Pulau Indah Power Plant in Port Klang, our team in KLIA received some of the Gas Turbine's parts that were shipped via air. The crate that weighed more than 2 ton was flown in from Brussels, Belgium. Due to its size, we used our low loader to send it to the site in Pulau Indah.

### 10 TON OF POWDER COATING FROM LUXEMBOURG TO MALAYSIA

We recently arranged a door-to-door import shipment from Luxembourg for our client that does pipe coating for onshore and offshore oil and gas projects. Glad to have worked with our partner in Luxembourg and look forward to this handling this regularly.

### AIR FREIGHTING 3 LARGE CRATES OF SWITCHGEAR PANELS FROM KLIA TO LONDON

### EXPORT OF LENS CLEANING KITS FROM KLIA TO KANSAI

**DELIVERIES FOR LSS4 SOLAR PROJECTS VIA PENANG AND PORT KLANG TO VARIOUS LOCATIONS**

Most of our customers have started the construction and import of materials for projects gazetted under the Large Scale Solar 4. Our team is having their hands full from the arrangements to almost 10 different project site locations. Very soon we will see the progress and completion of some of the projects.

**HANDLING OF IMPORT, STORAGE AND TRANSPORT OF STEEL COILS**

For more than 30 years we have been handling the import of steel coils, both via containers and breakbulk vessels. Due to Malaysia's import requirement, we also assist clients in managing the permit inspection and testing process. One of our warehouses caters specially for the storage of coils of various types of sizes. They are used in the manufacturing of steel products.

## HANDLING AND STORAGE OF FERTILIZERS IN JUMBO BAGS

This is a new client supplying fertilizers to East Malaysia but due to the lack of storage space, our warehouse is used as a transit point before the goods are shipped to the respective locations. It will be a long term business as client is happy that can meet their expectations, especially our experience in handling their cargo.

## Deliveries of Tanks from Balakong to Port Klang

## PROJECT

Cargo: Tanks (14 units)  
Dimension: 15.50 m x W2.80 m x H2.80 m  
Weight: 12 ton each

## Export of Solar Turbines to Argentina

## PROJECT

Cargo: Waste Heat Recovery Unit Assembly  
Dimension: L10.35 m x W4.77 m x H5.26 m  
Weight: 41.3 ton

We recently handled several shipments exporting Solar Turbine sets from Port Klang to Buenos Aires, Argentina. There were many different cargoes including the largest WRHU Assembly, Exhaust Ducting, Platforms and other smaller instruments. Some of the items were shipped in normal and Flat Rack containers while the WRHU Assembly unit was loaded as an uncontainerised cargo (UC).
