

## MORE THAN 500 CONTAINERS IN 5 MONTHS FOR SOLAR FARM

This is the country's first large scale solar (LSS) project in Kuala Langat and is expected to be fully set up in November 2018. Our scope of work includes customs clearance and delivery of all the containers from Port Klang to Kuala Langat, both of which are scheduled to be completed by the coming April.

## TIME-CRITICAL OOG SHIPMENT FROM PORT KLANG TO CEBU

The cargo is a tank weighing 26 ton (L14.1 m x W3.91 m x H3.90 m) where we picked up using a low loader from Senawang, Negeri Sembilan and transported to Klang Container Terminal (KCT).

Only one carrier could fulfill our special equipment request and they called at North Port. North Port only caters to direct loading, thus it was extremely crucial for us to plan the right timing for pick-up, transfer, lashing and choking of the cargo.

Plus, due to the height there were also restrictions from overhead bridge in North Port so lashing works could only be done in front of the KCT before the delivery.

## SHIPPING AN **ALFA ROMEO** TO SYDNEY

Our warehousing team stuffed the Alfa Romeo into a 20-footer container, did the lashing and prepared it to be shipped out of Malaysia. The client had de-registered the car with JPJ and decided to move it to Sydney, Australia.

### PROJECTS BY OUR ASSOCIATE **MEGALIFT**

Cargo: Transformer  
Dimension: L12.60 m x W8.10 m x H7.75 m  
Weight: 520 ton

Transportation & Positioning of Transformer for Jimah East Power Plant

### Transportation of TBM for Klang Valley MRT Project

Megalift has completed a series of transportation for tunnel boring machines of different weights and dimensions from Westports to Titiwangsa, one of the upcoming MRT stations. And more TBM movements are expected in the coming months!

# Activities within the MTML Group

## Multi-Trans & Megalift Fun Club Family Day in Sunway Lagoon

We had a family day on 25th November 2017 which was part of the company's Fun Club initiative with attendees of more than 350 people, comprising employees and their family members.

## Exporters Guide 101 for Alibaba Customers in Malaysia

Our CEO, Mr Edwin gave an informational talk to a group of SMEs, most of whom are new exporters seeking to understand more about trade and logistics.

## Training by Scania for our Truck Drivers

With help from Scania, we recently conducted a training session for our drivers to learn about the newly purchased trucks as part of our fleet expansion plan.
