

## AIR FREIGHT

### 5 TON OF MACHINES FROM KL TO NARITA

Our client is an internationally renowned power plant equipment supplier and these equipment are usually high value products. We recently exported more than 10 large crates of portable drilling steel machines weighing a total of 5 ton from Kuala Lumpur to Narita Airport.

A large volume of laboratory instruments were imported by a Malaysian lab equipment supplier from USA to be used for research and lab tests purposes.

### LAB INSTRUMENTS FLOWN IN FROM USA

### FURNITURE FOR ELITE HIGH-RISE RESIDENTIAL PROJECT

One of our new clients supplies furniture to fully furnished residential development.

We recently handled the first few of the many shipments of imported furniture for a high-end condominium in the heart of Kuala Lumpur. All the goods are being stored in our warehouse awaiting for delivery in several batches.

In a recent project shipment for Klang Valley's ongoing railway link, we handled about 2,800 pieces of rails measuring 25 meters each in Port Klang. We received them piece by piece at the port, did some sorting before delivering to several different sites. Every piece weighed approximately 1.50 ton and required the use of two forklifts working in sync to load and unload.

## **2,800 PIECES OF RAILS** **FOR 70-KM RAILWAY LINE** **IN KLANG VALLEY**

## **700 CONTAINERS** DELIVERED IN 4 MONTHS FOR **SOLAR PLANTS**

We have been handling back-to-back solar plant projects for the past year and certainly the months to come as well. For this 110-hectare solar facility in the East Coast of Peninsula Malaysia, large shipments carrying PV modules inverters and solar structures are delivered very much on a daily basis due to the client's tight construction deadline.

We spent days receiving, handling and stuffing a large volume of DG cargoes in our warehouse in Port Klang. They were shipped out from Port Klang to East Malaysia for a local chemical and industrial supplies merchant who is one of our long established customers.

## **BIG VOLUME OF DG CHEMICAL PRODUCTS SHIPPED FROM PORT KLANG TO EAST MALAYSIA**

## **TRANSPORTING FOR A NEW POWER PLANT IN MELAKA**

This 2,242 megawatts combined cycle gas turbine power plant is the latest power project in Malaysia. Such a large scale power facility involves the importation of different power related items from various countries. Port Klang is the port of discharge and our warehouses are utilised for temporary storage before we deliver them to Melaka.

We recently attended the WACO Annual General Meeting held in Cyprus. There were 115 delegates from 99 different countries in the event to build better links between WACO members. Having been a member for more than 20 years, it's never a dull moment meeting old friends and making plenty of new ones. These are people from all over the world who will support our moving of goods for our customers.
