

RAILS FOR MALAYSIA'S MEGA RAILWAY PROJECT

We have been entrusted to deliver 5,500 pieces of rails measuring 25 meters in length each from Port Klang to Johor. This double-track railway line, spanning almost 200 kilometers within Peninsula Malaysia expects to see its full operation in year 2022.

AIR FREIGHT

RAW INGREDIENTS FOR CHOCOLATES

One of our regular long-term clients is the world's leading manufacturers of premium chocolates. We handle plenty of import and export for their base here in Malaysia including products such as nuts, cocoa powder and other key ingredients.

TELECOMMUNICATION CABLE PIPES

We recently air freighted four large crates of network cable duct pipes from Germany. The pipes were urgently in need for the set up of the underground local and inter-city optical telecommunication network.

One of our newly secured customers is a leading manufacturer of trailers and semi-trailers. They are shipped in primarily from China in chassis and several other parts. We're tasked to unstuff them from the container, perform minor installation and store the trailers at our yard in Port Klang before delivery. We're glad to seal a long term contract for their regular importation.

CHASSIS & TRAILERS **HANDLING, INSTALLATION & STORAGE**

SPECIALLY ENGINEERED PIPES FOR RAILWAY TUNNEL PIPELINES

These heavy duty pipes are used extensively for long distance underground tunneling pipeline of railway lines. They're imported in large amounts in containers, stored in our warehouse awaiting requests of delivery to construction sites. As the pipes are long, unstuffing them is time-consuming and requires special handling and extreme care.

SOUTH EAST ASIA'S LARGEST **INTEGRATED PHOSPHATE ADDITIVES** **IN SARAWAK**

A leading Malaysian phosphate manufacturer expands its additives complex to Bintulu, Sarawak. This new plant is expected to produce 500,000 tonnes of food, fertiliser and halal feed phosphates. We have been appointed as their official freight forwarder to import various goods for the setup of this new plant.

MASSIVE EXPORT OF CABLE DRUMS TO AUSTRALIA

We recently arranged several large shipments of cable drums exported to Sydney, Australia.

Cable drums are usually heavy and require skilled handling as well as proper chocking and lashing. Thanks to our experienced warehousing team, their efficiency is indeed praiseworthy!

TRANSFORMERS FOR NEW POWER PLANT IN MELAKA HANDLING, STORAGE AND DELIVERY

This new 2,242 MW combined cycle gas turbine power plant in Melaka involves the importation of numerous oversized cargoes and many other smaller items such as low capacity transformers that we've been handling. Some of these items are stored in our warehouse prior to delivery and we are expecting a lot more movements in the months to come.

Port is not a place that people visit unless you hold a port-related profession or work within the port. Many of our customers, while familiar with the functions of a seaport, have never stepped foot in to the port.

Our organising regular visits is a great opportunity for them to understand and gain knowledge of port operations.
