

NEW BATCHES OF ROBOTIC ARMS FOR THE EXPANSION OF A MANUFACTURING FACILITY

This is the first among the many shipments to come for the expansion of a manufacturing plant. We take charge of the import, provide storage solutions and the handling of goods until they arrive safely into the factory. To protect the floor surface, we also provided plywood floor protection throughout the entire work space for the storage of the goods and movement of forklift.

HANDLING & TRANSPORT OF ESCALATORS FOR A CONSTRUCTION PROJECT

Our team is well-versed with the import and handling of escalators and elevators in Malaysia. At one point, half of our warehouse spaces were taken up by these long trusses. Recently we have secured a new tender to import, handle and deliver to the site, approximately 160 km up North from Port Klang. Looking at the schedule, more shipments will arrive in the next few months.

HANDLING & STORAGE FOR FMCG PRODUCTS

Our client is a renowned manufacturer of dairy products in Malaysia, particularly creamers. We are handling the storage and distribution of their raw materials and finished products. They supply to both the local and overseas market.

ONGOING ACTIVITIES FOR SOLAR LSS4 PROJECTS

We have secured several more projects gazetted in the large-scale solar 4 and are currently handling the clearance and deliveries to various different sites. Our warehouse is also being used as a transit point for storage and distribution to sites in batches.

AIR FREIGHT

HIGH VALUE OPHTHALMIC INSTRUMENT FROM PORT KLANG TO KUCHING

This is an ophthalmic medical device required to be sent to a hospital in East Malaysia that we handled for our client recently.

FARMING SEEDS FROM KL TO JAKARTA AIRPORT

Our client has recently expanded their export to Indonesia after securing a new buyer. They also export to China, Europe and other countries in SEA.

DURIAN PARTY IN KLIA OFFICE

Our air freight division in KLIA organised a durian party since durian is in season and they invited our neighbours to devour the King of Fruits together!

Cargo: Jib Crane
Dimension: L18.80 m x W2.30 m x H2.35 m
Weight: 18.2 ton

This is a combined breakbulk and container shipment arranged from Port Klang to Panama transitting via Port of Busan. The set of overhead crane was shipped out to Manzanillo Port for the expansion of the Costa Norte LNG Terminal in Panama.

The loading operations and transshipments of all 11 packages were expertly performed at both Port of Busan and Port Klang. We're glad to have worked with our counterpart in Busan for a successful delivery.

Upgrading of Airport Facilities

PROJECT

Cargo: Series Tunnel
Dimension: 17.65 m x W3.68 m x H3.95 m
Weight: 24 ton

We are currently handling the import of this breakbulk shipment from China in Port Klang. They are sets of passenger boarding bridges - packages including the tunnels, columns, lifting systems, and bogies, as part of the airport's refurbishment plans. From Port Klang, we will deliver them in batches crossing 500 km of road distance.
