

## Happenings in Multi-Trans

### Flying a Bentley

While cars shipping is common practice, air freighting a Bentley isn't quite the regular cases we handle on a day-to-day basis. But thanks to our experience and good coordination with our partner in Kuching, Sarawak, this Bentley was flown smoothly from KLIA.

### Import

### More than 600 High Cube & Flat Rack Containers for Malaysia's First & Largest Floating Solar Plant

Solar is a booming industry in and the latest project that we embarked on is Malaysia's 1st and largest floating solar system of 30MWac covering an area of 150 acres in the state of Negeri Sembilan. There's already a 21-year power purchase agreement signed for this solar facility. We are managing the import of various solar related items including panels, inverters, substations and overdimensional transformers.

### ***Rushed Merchandise for Malaysia's Election Day***

Time was tight and we only had a couple of days to get these merchandise from China to arrive in Malaysia. So yes, we air freighted the items and managed to deliver them in time for the election.

### ***Massive Shipments of Railway Equipment***

Our client supplies railway equipment to various projects in Malaysia and we've been handling their shipments catering to one of Klang Valley's new transit links.

This 59-km railway line will begin its first phase operations in July 2021 but full completion will only take place a year later.

### ***Bentonite for Construction of 150-km Railway Line***

Bentonite is a type of clay material largely used as lubricant to prevent thermal heating in cable pipes installed under the railway lines. Importation of bentonite in Malaysia requires a permit from the Agricultural Department, of which we performed the application for our client.

Bags of bentonite are currently being stored in our warehouse awaiting progressive deliveries. The project is expected to see completion in year 2020.

## Export

### High Quality Paper Export to 40 countries

We've added another name to our list of customers in the paper manufacturing industry. And they export different kinds of paper to more than 40 countries in the world.

### Bringing Malaysia's soy to Asian countries

Malaysia produces among the highest quality soy in the world and our customer covers exports to primarily Asian countries, with an approved license from the Malaysian Quarantine & Inspection Services department.

### JC Trans Network Conference 2018 | Bangkok

We are always expanding our global network and maintaining friendly ties with agents from all over the world. We believe great overseas support certainly helps us serve our clients better.

### Projects by our associate **Megalift**

Cargo: Reactor  
Dimension: L22.30 m x W2.90 m x H3.15 m  
Weight: 270 ton

### Project: Isononanol (INA) Plant

Megalift has recently embarked on a new project, an Isononanol Plant in Pengerang which is expected to come on-stream by the second half of 2019.

## Jimah East Coal Fired 2 x 1000 MW Power Plant

Scope: Double Banking in Port Klang, barging to Jimah jetty and delivery to site

Cargo: Panels of various sizes, shapes and weights

## Heavy Lifting of Rotor

Heavy lifting is one of Megalift's areas of expertise with a team of skilled and experienced engineers.

Cargo: Rotor

Dimension: L10.25 m x W1.20 m x H1.20 m

Weight: 41.50 ton

## Activities within the MTML Group

Hiking Adventure - it's not the mountain that we conquer, but ourselves!

MTML Fire Extinguisher Training by Safety Team
